

DVD AND VIDEO LENDING LIBRARY

2009

TO: Trust Members

FROM: Carol Fronczek, Vice President, Loss Control Services

SUBJECT: Video Lending Library

The Trust Video Lending Library is a comprehensive collection of safety training materials available for free loan to Trust members. Subject matter is specifically designed to satisfy the training needs of our members on a variety of health care topics.

Please return videos by United Parcel Service or other similar delivery *within three days* after the training date you provided to us. Please note that videotapes are not to be copied under any circumstances due to copyright laws. Your cooperation is appreciated.

Due to the increasing requests to borrow videos, the Trust has also negotiated discounts for Trust members who use videos on a regular basis in their training and who wish to purchase their own Coastal Training Technology videos at a reduced rate.

A discount off the list price is being offered to current Trust members. **To obtain the discount or further information, please contact Cindy Brooks, Account Executive at Coastal and identify yourself as a current Trust member. Her address and other information are as follows:**

Coastal Training Technologies

Contact: Cindy Brooks, Account Executive

Coastal Training Technologies

500 Studio Drive

Virginia Beach, VA 23452

Toll free: 1-800-729-4325 ext 3182

Fax: (757) 498-3657

Email: cindyb@coastal.com

Website: www.coastalhealth.com

Online catalog: www.coastalhealth.com/pdfcat.html

Order online: www.coastal.com/orders

TRUST members receive a 10% discount. Please identify your organization as a member of the Trust.

Coastal will ship the purchase to you and invoice you directly. Your employees receive the benefit of quality videos for use in training seminars, while your company receives the benefit of improving workplace safety, employee morale and efficiency, increasing safety awareness, reducing claims and potentially reducing insurance premium.

For assistance with Coastal Training Technologies or other information on loss control programs, please contact your Loss Control Consultant, e-mail us at garnett@wctrust.com, or call (203) 678-0123.

DVD/Video Summary

DEFENSIVE DRIVING

Coaching the Experienced Driver (VHS)

D1, D1a

This program features comprehensive coverage of collision-prevention techniques including vehicle inspection, cushion of safety, scanning, vehicle positioning, safe backing and parking procedures, handling blind spots, etc.

Length: This video is part of a 3 to 3 ½ hour training session

Coaching the Van Driver 11 (VHS & DVD)

D2, D2a

Commercial vans are very different than passenger cars. They are bigger, heavier, have larger blind spots, and require longer following and stopping distances. Training drivers to compensate for these differences can help keep them on the road and on the job.

Length: This video is part of a 4 hour training session

Next Step Coaching/A Driver Safety Refresher (VHS)

D3

This video program is designed for experienced drivers who have already had some form of driver training by zeroing in on and reinforcing specific safe driving concepts that experienced drivers may be familiar with, but may not practice, in their everyday driving. Includes fifteen driving situations and follow-up questions.

Length: 25 minutes

Transporting Passengers with Special Needs (VHS)

D4

With the increasing focus on the safe transportation of passengers with impairments, today's drivers must be trained as professionals, and schooled not only in defensive driving techniques, but also in safe passenger assistance procedures. Both public and private organizations that transport special needs passengers are responsible for training their drivers to perform their jobs as professionals, keeping the passengers' safety and dignity in mind at all times.

Length: This video is part of a 6 to 8 hour training session

Coaching the Maintenance Vehicle Operator (VHS)

D5

This is a comprehensive defensive driving program that focuses on improving an operator's ability to read traffic conditions, act accordingly, and prevent collisions, both on the road and at work.

Length: This video is part of a 4 ½ hour training session

Snowplow Safety: Parking Lots (VHS)

D6

This program focuses on specific safety issues regarding the plowing of parking lots. It can be used for self-directed or classroom study, and is ideal for pre-and in-season training. Topics addressed include Pre-season site preparation, Equipment inspection, Scanning for hazards, Clearing entrances and exits, Where to distribute plowed snow, and Special considerations for 24-hour operations

Length: 19 minutes

DEFENSIVE DRIVING (continued)

Coaching the Emergency Vehicle Operator (CEVO) Ambulance (VHS)

D7

Comprehensive coverage of collision-prevention techniques, including cushion of safety, scanning, vehicle positioning, handling blind spots, safe backing and parking procedures, and more. Coverage of a wide range of other safety-related topics, including vehicle inspection, vehicle handling and design characteristics, emergency and non-emergency driving differences, and safety at the emergency scene.

Length: This video is part of a 6 to 8 hour training session

Coaching the Emergency Vehicle Operator (CEVO II) Fire (VHS)

D7a

Participants will appreciate the non-lecture, participant-intensive educational approach in CEVO II. Fire personnel and instructors will appreciate the program's flexible and easy to use format. Comprehensive coverage of collision-prevention techniques, including apparatus inspection, cushion of safety, driving with lights and siren, specific traffic situations, and more.

Length: This video is a 6 hour training session

Coaching the Emergency Vehicle Operator (CEVO II) Police (VHS)

D7b

Participants will appreciate the non-lecture, participant-intensive educational approach in CEVO II. Police personnel and instructors will appreciate the program's flexible and easy to use format. Comprehensive coverage of collision-prevention techniques, including vehicle inspection, cushion of safety, special traffic situations and more.

Length: This video is a 6 hour training session

Coaching the Van Driver/Self Instruction (VHS)

D9, D9a

Topics addressed include: *pre-trip inspection, safety belts, van characteristics, scanning, backing, cushion of safety, blind spots, and city, highway and rural driving.* An optional *Transporting Cargo* segment addresses specific situations such as familiarity with the route, cargo placement, double-parking, making deliveries, and following distance. The optional *Transporting Passengers* segment addresses critical safety points concerning safe stopping points, pick-up and drop-off procedures, passengers as pedestrians, and safety belt use.

Length: This video is part of a 4 hour training session

Distracted ! (VHS)

D10

Tractor-trailer and other professional drivers are far more likely to be the victims of distracted drivers because of the amount of time they spend on the road. This training program can help both new and veteran drivers know what to look for and what to do when they encounter distracted drivers. The video shows drivers the dangerous behaviors of distracted drivers and the actions to take to avoid those drivers. It also shows drivers how to avoid becoming distracted drivers themselves.

Length: 15 minutes

DEFENSIVE DRIVING (continued)

Defensive Driving - Prepared For the Worst(VHS & DVD)

D11, D11(a)

Defensive drivers anticipate how to deal with road hazards, poor weather conditions, vehicle collisions and crime. This program shows how to stay in control by being prepared for the worst. Topics covered include Nature's forces, Night driving, Breakdown basics, Accidents, Road construction, and Personal security.

Length: 18 minutes

Parking Safely (DVD)

D12

There is more to parking a vehicle than simply pulling into a space, turning off the ignition and closing the door behind you. In fact, parking can be just as hazardous as driving in traffic, since many drivers and pedestrians disregard all normal traffic laws once they arrive in a parking area. Topics include Scanning for hazards, Sharing the roadway with pedestrians, Personal safety considerations and Covering the brake.

Length: 15 minutes

Backing Safely (DVD)

D13

Backing is the cause of a large number of collisions — a disproportionate number — since drivers spend a relatively small amount of time actually backing. And, although speeds are normally low, these collisions not only create inconveniences, they cause significant property damage and even personal injury. Backing Safely offers practical safety information that can help drivers eliminate backing collisions.

Length: 13 minutes

Safe Winter Driving Considerations (DVDs)

D14, D14(a), D14(b), & D14(c)

These information-packed dvds zero in on safety tips and techniques for handling the hazards of winter driving. Topics covered in the video include: pre-season preparations, on the road issues and pre-trip procedures. Pre-season preparations cover areas such as maintenance checks and tire checks. On the road issues includes topics such as narrowed lanes, sharing the road and scanning for hazards. Pre-trip procedures cover areas such as choice of clothing, fluid check and vehicle warm-up.

Length: 20 minutes

Driving to Distraction (DVD)

D15

This groundbreaking program illustrates just how dangerous distracted driving can be. The main character is the embodiment of the various distractions that accompany drivers. Watch as he gleefully plots and plans to take attention from the road. The impact of this program is powerful and memorable.

Length: 17 minutes

ERGONOMICS - OFFICE

Office Ergonomics: *It's Your Move* (VHS)

EO1

Every year nearly two million American workers suffer musculoskeletal disorders. From pinched nerves and strained muscles to inflamed tendons and sore necks, musculoskeletal disorders (MSDs) come from stressing your body beyond its ability to recover. Today we know that MSDs can strike anyone, even people who work in offices. Topics covered are: The signs and symptoms of MSDs, Recognizing MSD risk factors, Preventing MSDs, and Benefits of protecting yourself while you work.

Length: 16 minutes

Office Ergonomics and the Computer Workstation (VHS)

EO2

This important video - Office Ergonomics and the Computer Workstation Training Video covers key ergonomics topics that impact your office workers-with particular emphasis on the computer workstation. Key topics covered: Desk and work surface setup , Proper workstation seating , Keyboard wrist positioning , Lighting and glare, RSIs, and Office chair usage.

Length: 30 minutes

ERGONOMICS - MATERIAL HANDLING

Back Safety (VHS)

EM1

Whether you have a physically demanding job, one that requires lifting or bending over, or you have a less active one, such as sitting behind a desk, the potential for injuring your back is very real. Using a fresh and humorous approach, this video covers the dangers your back faces every day on the job. Topics covered include: Awareness, Types of back injuries, Safe lifting practices, and Exercise.

Length: 15 minutes

Back Safety for Material Handlers (DVD)

EM2

Injuries strike more than one million workers every year, resulting in lost time, wages and productivity. And nowhere is this danger more pronounced than in your material handlers. Show them the proper back safety techniques and illustrate exercises for strong and flexible muscles. Topics covered are back structure, repetitive stress & reverse stretching, proper lifting, vehicles & back safety, hand trucks and warning signs of a back injury.

Length: 13 minutes

ERGONOMICS - PATIENT HANDLING

Ergonomics: Safe Patient Transfer (DVD)

EP5

Back injuries and other musculoskeletal disorders are rampant in the healthcare industry. Topics covered include: Back protection when working with patients, Recognizing risk tasks in daily work, Identifying risky patients and risky locations, and Types of mechanical devices to use during patient care.

Length: 16 minutes

ERGONOMICS - PATIENT HANDLING (continued)

It's Your Back, Don't Break It (VHS)

EP2, EP2a

Designed specifically for home care workers, this video explains how to lift and move patients safely. It also describes how employees can protect their backs with good posture, diet and exercise. This program can easily be incorporated into your agency's current back safety program and can be used to update supervisors on current back safety procedures. Topics covered include: How the back works, Posture and exercise, Safe lifting, and Preventing back injuries.

Length: 20 minutes

Ergonomics: Watch Your Back (DVD)

EP3

Whether your staff is moving patients, test tubes, laundry or food, they need to protect their back from undue stress. All healthcare workers have a high risk of developing musculoskeletal disorders or back injuries. This dvd includes the following topics: General back safety, Symptoms of back problems, Recognizing the dangers, Preventing MSDs , and Safe material handling.

Length: 15 minutes

Patient Lifting: Safe Strategies (DVD)

EP4

The Bureau of Labor Statistics cites that nursing aides, attendants and orderlies have the highest risk of musculoskeletal disorder from on-the-job activities. Protect your staff with the NIOSH-approved techniques found in this new program. Your staff will learn step-by-step techniques on lifting and moving patient as well as inherent risks for improper procedures.

Length: 15 minutes

HEALTH

Working with Stress

H1 (VHS) H1a (DVD)

This NIOSH training and educational video program on the topic of workplace stress describes workplace factors that can create or exacerbate worker stress, and suggests practical measures for reducing job-related stress through changes in work organization. It combines authoritative information with an easy-to-understand, viewer-friendly presentation.

Length: 17 minutes

Latex Allergy – Stop the Reaction (VHS)

H2

Allergic reactions to natural rubber latex products are being recognized with increasing frequency among healthcare workers who use gloves and other products containing latex. This program contains guidelines for minimizing latex-related health problems while maximizing protection. Topics covered include: What latex allergy is, Types of reactions caused by latex, Who is at risk for latex allergy, and What you can do to protect yourself.

Length: 22 minutes

HEALTH (continued)

Why Don't We Do It In Our Sleeves (DVD)

H4

The right coughing technique prevents spread of germs. Are you still coughing and sneezing the way they did during the plague? Into the air, your hands, tissues and handkerchiefs? Then you need to see this video. You'll learn to cough and sneeze in places that are less likely to spread infections and keep germs alive.

Length: 5 minutes

Cultural Competency: Just Good Healthcare (DVD)

H5

What is Cultural Competency in healthcare? In simple terms, it's medicine at its best: patient-centered care. Healthcare providers who are sensitive to the cultural and religious beliefs of the communities they serve, particularly surrounding health and illness. Includes realistic healthcare scenarios representing many different cultures and beliefs.

Length: 16 minutes

H1N1 Flu (Swine Flu): Pandemic Awareness for Healthcare (DVD)

H6

This important program will help you educate and protect your employees against a threat of H1N1 Flu. The program discusses the following topics: What is it and how is it transmitted?; What to do in case of exposure? Symptoms and treatment. Hand hygiene.

Length: 15 minutes

INFECTION CONTROL

BBP - A Sharper Image (VHS)

IC1

This video program offers a concise look at the transmission, treatment and prevention of bloodborne pathogens, specifically: Hepatitis B, Hepatitis C and HIV, the Human Immunodeficiency Virus. Topics covered include: Effects of HIV, HBV, HCV, Personal protective equipment, Engineering controls, and Safe work practices.

Length: 19 minutes

BBP - For Ambulatory Care (VHS)

IC2

More than half a million sharp-related injuries occur each year, according to OSHA. Safety devices now include needleless systems and engineered protective devices for needles and other sharps. Studies show that sharps safety devices may significantly reduce your risk of injury during procedures such as joining IV lines, drawing blood, injecting medications and suturing during surgery. Topics covered include: Hepatitis B and C Virus, Transmission and exposure to HIV, Hepatitis B vaccine, Standard Precautions, Personal Protective Equipment, Safe Work Practices, and Sharps Safety.

Length: 19 minutes

INFECTION CONTROL (continued)

Infection Control: Break the Chain (VHS)

IC3

OSHA and JCAHO require a comprehensive infection control program in all healthcare facilities. This video program will teach workers how to protect themselves and their patients from infections. Employees will learn about the tools needed to break the infection transmission chain. Topics covered include: Handwashing, Immunizations, Standard Precautions, and Placement Evaluation.

Length: 22 minutes

Infection Control for Home Health Care (VHS)

IC4

By following the basic infection control practices outlined in this video program, your home care workers can protect themselves and their patients from the spread of infection. Topics covered include Work practice controls, and Housekeeping and laundry.

Length: 22 minutes

BBP - Protection in Home Care Setting(VHS)

IC5

The home care provider can be exposed to blood and potentially infectious body fluids, regardless of their specific responsibilities. This program outlines the proper precautions that should be followed to ensure safety on the job. Topics covered include: Workplace transmission, Standard Precautions, HBV vaccination, Work practice controls, and Housekeeping and laundry.

Length: 17 minutes

Infection Control Orientation: Based on Standard Precautions (VHS)

IC6

Over the past few years, the risk of infection has increased for both patients and hospital staff. Practicing proper infection control procedures is one of the most important responsibilities of a healthcare worker. Topics covered include Sources of infection, Transmission, Standard Precautions, Proper handwashing procedures, and Importance of PPE.

Length: 19 minutes

Infection Control: Featuring Drug-Resistant Organisms (VHS)

IC7

The role of infection-control practitioner is more difficult than ever due to the rapid emergence of drug-resistant organisms. This program outlines the procedures necessary to prevent the spread of these deadly organisms. Topics covered: What are drug-resistant organisms, Discusses VRE and MRSA, and Describes drug resistant tuberculosis.

Length: 18 minutes

Needlestick Prevention - Five Steps To Safety (VHS)

IC 8

This program reviews five steps employees can take to protect themselves when working with sharps.

Length: 14 minutes

INFECTION CONTROL (continued)

BBP - A Healthcare Refresher (VHS)

IC 9

This video is short and to the point. It is ideal for retraining healthcare professionals in a hospital setting who have already received initial training. Topics covered include: Hepatitis B & C Virus, HIV, Transmission and exposure at work, Safety precautions, Hepatitis B vaccine, Standard precautions, Personal protective equipment, and Safe work practices.

Length: 11 minutes

Tuberculosis Awareness: (VHS)

IC 10

Anyone can contract TB and its new drug resistance strains. This video will help your employees understand TB and how to fight against it. Topics covered include: How TB is contracted, Symptoms, What happens if you become infected, and Who is at risk.

Length: 16 minutes

Tuberculosis - Identification and Control (VHS)

IC 11

Every healthcare facility needs a TB infection control plan, and every healthcare worker needs to be thoroughly trained in preventing the spread of disease.

Length: 15 minutes

Hand Hygiene: For Hands That Care (VHS)

IC 12

We all recognize the importance of keeping hands free of infectious microorganisms, but statistics indicate we're not following through in practice. Contamination can occur during direct patient contact, such as intravascular catheter care, respiratory tract care, or when handling patient secretions or excretions. Topics covered are the importance of hand hygiene, CDC hand hygiene guidelines, hand decontamination, surgical hand antisepsis, dermatitis, hand hygiene and glove use

Length: 17 minutes

Infection Control During Construction: A Health Care Construction Crew Training Video (VHS)

IC 13

This is an introductory training and educational tool for construction crews who work in your facility. This video is designed to help contractors understand the necessary precautions they must take in order to maintain proper infection control during construction and renovation projects in your facility.

Length: 20 minutes

Respirators: Your TB Defense and TB Respiratory Protection: Administrator's Review (DVD)

IC 14, IC 14a

This program is designed to educate health care workers on proper respiratory protection. The "Administrator's Review" section of this DVD takes the viewer step-by step through developing a respiratory protection program for tuberculosis.

Length: 48 minutes

INFECTION CONTROL (continued)

Bloodborne Pathogens in Behavioral Healthcare (VHS)

IC 15

As you know, OSHA's Bloodborne Pathogen Standard 1910-1030 mandates that all healthcare workers obtain annual retraining on bloodborne pathogens. This video will teach healthcare workers how to reduce the risk of exposure to Hepatitis C, Hepatitis B and HIV. Topics covered include: Standard Precautions to take to reduce exposure, and What to do if an exposure occurs.

Length: 17 minutes

MRSA and VRE Precautions: *Battling Superbugs* (VHS)

IC 16

Topics covered: The problem of Antibiotic Resistance, Preventing Transmission of MRSA & VRE, and What health providers can do.

Length: 16 minutes

SAFETY - DISASTER PREPAREDNESS

Disaster Planning: Defuse the Time Bomb (VHS)

SD1

Whatever the disaster, your facility must react effectively to save lives, treat casualties and maintain high quality patient care. This program will teach employees how to stay alert to preventing disasters such as fires, explosions and violence. Topics covered include: Types of disasters, Prescription for survival, Role division, and Drill preparedness.

Length: 20 minutes

Evacuation of Health Facilities (VHS)

SD2

Major fires in health care facilities are rare, but can be deadly. Most patients cannot leave the fire area without assistance. This video follows the recommendations in *NFPA 99* and *NFPA 101*® to train your staff on the following topics: Use of the manual fire alarm pull station, When to use a fire extinguisher, Oxygen Shutoff, Smoke barrier doors, Smoke compartments, and Horizontal and vertical evacuation.

Ideal for all physicians, nurses, volunteers, administrators, facilities and environmental departments, and others working in a patient care environment.

Length: 16 minutes

SAFETY - ELECTRICAL

Healthcare Electrical Safety - AMPle Protection (VHS)**SE1**

The healthcare employee works with more electrical devices, monitoring equipment and diagnostic equipment than ever before. From maintenance shop to emergency room, from operating room to patient bedside, it is an environment where the power and potential hazards of electricity abound. Topics covered include: OSHA 1910.331-335 Electrical Safe Work practices, JCAHO - required training, Electrical safety guidelines, Common hazards, and Electrical equipment typical to the healthcare environment.

Length: 18 minutes

Lockout/Tagout: An Open and Shut Case (VHS)**SE2**

This program helps solve the mystery of lockout/tagout by focusing on the basics. It will help your company comply with OSHA 1910.147 and avoid catastrophic accidents. Topics covered include: What lockout/tagout is and when to perform it, OSHA's six steps to controlling hazardous energy, and OSHA's three steps for safe restoration of energy.

Length: 14 minutes

SAFETY - FIRE**Fire Safety in Home Health (VHS)****SF1**

This program emphasizes the basic facts about fire, steps to take to assess fire hazards in patients' homes, and ways to teach families how to prevent, control and escape home fires. Topics covered include: Home fire statistics, Basic fire safety tips, PASS, and RACE for safety.

Length: 23 minutes

Fire Safety: Mission Possible (VHS)**SF2**

Fire is the third-leading cause of accidental death in the United States, with more than 150 workplace fires occurring every day. This program will help you train your employees in the proper fire safety procedures which can save their lives and the lives of their patients. Topics covered include: Fire prevention procedures, and Fire extinguishers.

Length: 20 minutes

Fire Safety: When It's Not Just a Drill (VHS)**SF3**

This program emphasizes the importance of on-going fire awareness and following proper fire safety procedures. Topics covered include: The critical minutes: initial response procedures, Patient Evacuation, Proper fire extinguisher applications and methods, and How to minimize the risk of fire at your facility.

Length: 16 minutes

SAFETY - FIRE (continued)

Fire Safety: Be Alert, Not Alarmed! (VHS)

SF4

Topics covered:

- 1) The three ingredients of a fire and what happens if one of those elements is missing
- 2) The burning stages of a fire and how to recognize the dangers of each
- 3) What happens in a flashover and the consequences of not acting quickly
- 4) When stairs are a danger zone and what to do
- 5) Dangerous reactions from residents and how to manage them in a fire

Length: 19 minutes

SAFETY - GENERAL

Healthcare PPE: Why Risk It? (VHS)

SG1

This program covers the different types of Personal Protective Equipment (PPE) available and discusses how they can protect you from on-the-job hazards. Topics covered include: Wearing the right PPE for the job, and Infectious hazards, chemical hazards and radiation hazards

Length: 19 minutes

Safety Techniques for Tying Down Wheelchairs (VHS)

SG2

This video program includes numerous examples of how to properly secure wheelchairs. Topics covered include: Types of securement systems, Types of wheelchairs, and Protecting your back.

Length: 18 minutes

Dealing with Bugs and Critters (VHS)

SG3

This program, designed especially for public works, utility, government employees or anyone whose job function includes grounds maintenance or outdoor responsibilities, is essential for a safe work environment.

Length: 16 minutes

Home Health Safety Orientation (VHS)

SG4, SG4a

This program will help employees recognize the potential hazards of working in a home care setting. It provides important safety tips which will protect employees and patients. Topics covered include: Slips, trips & falls, Back injuries, Electrical safety, Fire safety, Infection control, Handling medical waste, Safe work practices, Personal protective equipment, Glove removal & hand washing, and Personal safety.

Length: 20 minutes

Slips, Trips and Falls: Avoiding Injury in the Workplace (DVD)

SG5

Slips and falls account for over 200,000 on-the-job injuries in the U.S. each year. This program identifies major slip, trip and fall hazards which may endanger employees. Topics covered include: Negotiating slippery surfaces, Controlling hazards, and Avoiding falls.

Length: 14 minutes

SAFETY – GENERAL (continued)

Pro-Active Safety In Action: Accidents Don't Have to Happen (VHS)

SG6

On-site stories of organizations which are using the Pro-Active Safety process will help motivate your employees. Topics covered include: Specifics on setting up a Pro-Active Safety program , How safety is integrated into the total organization, Role of management, and The Importance of continuous training.

Length: 23

Healthcare Safety Orientation: For Your Own Good (VHS)

SG7

This program will help employees recognize the potential hazards of working in a healthcare setting. It provides important safety tips which will protect employees and patients. Topics covered include:Slips, trips, and falls, Back injuries, Electrical safety, Fire safety, Disinfection & sterilization, Handling medical waste, Housekeeping, Radiation safety, Hazard communication, Personal protective equipment, and Glove removal & hand washing.

Length: 16 minutes

Difficult Behavior: Breaking Through (DVD)

SG8

Problem behavior is a catch-all term that refers to patients' actions that are not dangerous but can still lead to disruptions of care. Examples if these actions include arguing with staff or visitors, challenging the rules, noisy behavior, name-calling and swearing. Topics covered include: The reasons difficult behavior must be handled, The intervention process, and Patients prone to difficult behavior.

Length: 21 minutes

Personal Safety for Home Health Caregivers (DVD)

SG10

Physical violence, verbal or sexual abuse is a dangerous possibility for healthcare staff during home visits. Kind words and streets smarts are not enough to ensure their safety. This program teaches practical ways to defuse potentially violent situations and show your staff how to prepare for visits, set-up security measures and know assault-cycle awareness to prevent possible harm.

Length: 15 minutes

Fall Prevention in Home Healthcare (DVD)

SG11

Create awareness about some of the proactive screening tools and protective strategies you can use to prevent falls where they most often occur in the patient's home. Topics covered include: How and Where, Conducting a fall risk assessment, Fall risk assessment scale, What to do if a patient falls, Physical assessment & fall prevention, and Preventing (un) anticipated falls.

Length: 16 minutes

Slips, Trips and Falls: Taking the Right Steps (DVD)

SG12

One safety slip and your employees will be on the slippery road to accidents. Slips, trips and falls cause injuries in the workplace, and you have to smooth out the risks through this high impact training program that advocates solid safety measures: awareness, good housekeeping and proper equipment use. Safety can take you a long way!

Length: 20 minutes

SAFETY - HAZARD COMMUNICATION

Main Street (VHS)

SH1

This video reviews health hazards associated with chemicals, safe handling, safe work practices, and safety information as contained on warning labels and Material Safety Data Sheets.

Length: 18 minutes

Hazard Communication Chemical Safety in Long Term Care (VHS)

SH2

This program is designed to help recognize the dangers of chemical exposure and develop safe work practices in the nursing home environment to protect you from injury. Topics covered include: Who is at risk?, Chemical Dangers Hazard, Communication Labels, Material Safety Data Sheets (MSDS's), and Proper Training.

Length: 15 minutes

Hazard Communication: It's a Two-Edged Sword (VHS)

SH3

This video teaches the healthcare worker to use chemicals safely by explaining the requirements of the hazard communication program. Topics covered include: Identification of hazardous chemicals, and What to do in case of exposure.

Length: 20 minutes

Hazard Communication: You Need to Know (VHS)

SH4

This program speaks to various hospital settings in which healthcare workers may come into contact with hazardous chemicals. Topics covered include: Understanding an MSDS, Identifying hazardous chemicals, Areas where potentially harmful chemicals exist, Permissible exposure limits, and Protective procedures.

Length: 17 minutes

SAFETY - KITCHEN

Safety: It's Your Responsibility: Handling Kitchen Tools (VHS)

SK1

This video demonstrates the importance of following basic safety procedures when handling kitchen equipment. Topics covered include: Safe handling of kitchen knives, How to safely wash and store knives, How to properly clean and maintain machines, Immediate first-aid and treatment for cuts.

Length: 10 minutes

Safety: It's Your Responsibility: Preventing Falls and Strains (VHS)

SK2

The objectives of this video are to teach employees that accidents can be prevented by following basic safety procedures, and to teach correct lifting techniques to prevent back or leg injuries. Topics covered include: Correct lifting procedures to minimize injury, Proper methods of cleaning spills, Correct way to use stepladders to prevent falls.

WORKPLACE VIOLENCE

Alzheimers Disease: Safe Response Techniques In Crisis Situations (VHS) V1

This video addresses the specialized needs of individuals with Alzheimer's disease and focuses on appropriate safe responses during crisis situations. The program is geared for the experienced caregiver working in the field of dementia. The video focuses on appropriate safe verbal and physical responses during crisis situations.

Length: 21 minutes

Defusing the Explosive Customer (VHS) V2

Most customers just don't "blow up." There's usually a build-up of tension and if you pay attention and learn to respond to these early "warning signs," you can help calm down the customer. This program will teach you how to identify and respond to these warning signs. You'll learn how to talk to customers who are anxious, to help defuse the situation on the spot, and how to keep customers from getting more angry, even on the phone.

Length: 40 minutes

Workplace Violence - First Line of Defense (VHS) V3

As the second-leading cause of workplace deaths, violence represents a challenge to employers who must be prepared to respond to and manage these incidents. This program uses an interview with a convicted perpetrator as well as a compelling dramatization to communicate the impact of this problem.

Length: 30 minutes

Home Health Care Violence - Be Smart, Be Safe (VHS) V4, V4a

The entire healthcare system in the United States is undergoing a fundamental change. Healthcare treatment is shifting from the hospital to the patient's home. And your role as a home care provider is shifting to include more and more primary care. This program reviews the vital procedures that you and your employees should follow to minimize risk and have greater security when performing your very valuable work.

Length: 22 minutes

Reduce Your Risk While Driving, Parking or Walking (VHS) V5

Whether on business or after hours, in or out of town, employees should follow basic safety procedures to prevent car-jacking, car theft, muggings, and other vehicle-related crimes. The video features personal safety techniques that employees and their families can use to guard against crime while driving, parking, or walking to and from their vehicles.

Length: 15 minutes

WORKPLACE VIOLENCE (continued)

Combative Resident: Mirror Their Reality (VHS)

V6

This program discusses the problems, causes and various forms of combative behavior which occur in long-term care facilities and helps you learn how to prevent your employees from being victims of combative behavior. Topics covered include: Forms of combative behavior, Potential causes, Keys to the successful management of combative behavior, and Learning to deal with combative incidents.

Length: 23 minutes

Violence On The Job (DVD)

V7, V7a

This program, produced by NIOSH in 2004, describes workplace violence factors, and suggests measures for reduction.

Length: 27 minutes
