

July-September 2021 Educational Webinars

The Trust is committed to providing our members and clients with educational resources covering a variety of relevant topics: OSHA compliance, safety and health best practices, COVID-19 information, and more. These are offered to our members and clients and can be viewed “live” or on demand 24 hours after the webinar has been completed.

We are pleased to offer more educational opportunities for our members and clients continuing with our Safety Solutions, Risk Management Series and the Supervisors Toolbox. In addition, we have added a new set of course offerings, the Safety Workshop Series, which is intended to assist with creating, developing and updating safety programs to ensure that our members are effectively protecting employees and conforming to OSHA regulations as OSHA requires site specific programs and trainings. This series will highlight specific safety programs that impact our members and clients.
